1. SOCIAL MEDIA MARKETING & INTERNET ADVERTISING
Today's communication is unthinkable without Social Media. If you told somebody 15 years ago that they will willingly share information about themselves on a platform where everyone can see them, they would have called you crazy.

Brands were just products and services. Any communication with them was much harder. And now, through the digital revolution, this and much more is possible. Social media became an part of the everyday life.
Distribution of the budget to maximize goals of the advertising campaigns on Facebook, Instagram, and Google.

Proposing formats and channels for most efficient digital advertising, tracking conversion and analyzing data, adjusting according to collected information.

Quality targeting of audience (age, sex, location, interests...) which allows us to truly offer clients’ messages to those who will be interested in it.

Complete analytical report at the end of each campaign with all key metrics, stats, and numbers, as well as propositions for further action.
